Soko Roam

<http://soko-roam.com/> 

Soko-Roam is a modern e-commerce platform designed to empower users to list, promote, and sell their products in a dynamic online marketplace. The platform provides an intuitive interface where users can easily create product listings, manage their inventory, and reach a broader audience.

A key feature of Soko-Roam is its product boosting system. This functionality enables sellers to increase the visibility of their products by promoting them to the top of the product feed. The prominence of each boosted product depends on the amount paid and the duration of the boost, allowing for customizable promotion strategies based on seller preferences and marketing goals.

To facilitate secure and smooth financial transactions, Soko-Roam integrates with Stripe, a trusted payment gateway. This ensures that both buyers and sellers can process payments with confidence, leveraging Stripe's robust security standards and global support.

In addition to its core e-commerce features, the platform includes a reporting system that offers valuable insights into financial activity. Both users and administrators have access to concise summaries and analytics related to transactions, boosting activities, and overall platform engagement. These reports help in monitoring performance, tracking spending, and making informed business decisions.

Soko-Roam delivers a reliable and scalable solution for online sellers, combining promotional flexibility, secure payments, and basic financial reporting into a single, user-friendly platform.

Total Echo LLC

<https://www.totalecoclean.com/> 

Total Eco Clean is a modern cleaning service platform that allows users to book eco-friendly cleaning services for homes and vehicles. The platform offers a variety of services including general home cleaning, carpet cleaning, and car interior detailing.

Users can choose from flexible service plans such as weekly or monthly subscriptions that are tailored to fit their lifestyle. All cleaning services are provided by professional, insured, and background-checked cleaners to ensure high-quality and trustworthy service.

Stripe payment integration is used for secure and smooth transactions, supporting both one-time and recurring payments.

The platform includes a content management system (CMS) that allows admins to easily manage and update website content such as service details, pricing, promotions, and testimonials. This helps keep the frontend dynamic and engaging for users.

Total Eco Clean also features advanced steam cleaning technology to provide a deeper and healthier clean, offering an improved experience in the cleaning industry.

Bimrparts

<https://bimrparts.com/> 

Bimrparts is a specialized marketplace platform designed for buying and selling second-hand BMW car parts. The platform connects car enthusiasts, mechanics, and resellers, making it easy to list, discover, and purchase used BMW components.

The system features a dynamic role-switching functionality, allowing users to seamlessly switch between buyer and seller roles within a single account. This ensures a smooth and flexible user experience for individuals who want to both purchase and sell parts.

To support secure and scalable transactions, the platform is integrated with Stripe Connect, enabling onboarding of seller accounts and handling multi-party payouts. Sellers receive their earnings directly into their connected Stripe accounts, while the platform retains administrative control over transaction fees and flow.

Bimrparts includes a product approval system, where listings are reviewed by an admin before becoming publicly visible, ensuring quality and trust across the marketplace.

The system also features a notification and email alert system that keeps users informed about order updates, approval status, account activity, and more, helping maintain engagement and transparency. Built with scalability and user experience in mind, Bimrparts delivers a focused and reliable environment for trading high-quality second-hand BMW parts.

Fresh pet kitchen

<https://pet-fresh-kitchen.netlify.app/> 

Pet Fresh Kitchen is an online pet food delivery platform that provides dogs with fresh, nutritious, and balanced meals tailored to their dietary needs. The system focuses on health, convenience, and affordability by offering personalized meal recommendations based on each pet's breed, age, weight, activity level, and specific health conditions.

Users can create personal accounts to manage pet profiles, browse a variety of high-quality pet meals, add products to their cart, and place orders. Each product is made from premium, natural ingredients and formulated to support digestion, energy, and overall well-being.

The platform offers a smooth and secure shopping experience with Stripe payment integration, supporting safe and easy transactions for all users. Customers receive real-time email notifications for order confirmations, delivery status, and other important updates.

Administrators can manage the platform through a content management system (CMS), allowing them to update product listings, pricing, and promotions. A product approval system ensures only quality products are made available on the storefront.

Pet Fresh Kitchen is designed to provide a complete and user-friendly solution for pet owners looking to give their dogs fresh, healthy meals, with a focus on quality, transparency, and customer satisfaction.

Cryptax

<https://www.cryptax.nl> 

Cryptax is an intelligent cryptocurrency taxation platform designed to simplify crypto tax reporting through smart automation, expert guidance, and secure tools. Built for both individual investors and corporate entities, the platform offers a comprehensive solution for managing crypto taxes with confidence and ease.

Users can create accounts and subscribe to premium plans to unlock access to advanced features such as AI-powered tax assistance, custom tax report generation, and real-time crypto calculators. The platform also integrates live chat support, where users can directly consult with certified crypto tax professionals for guidance on compliance, deductions, and filing strategies.

Cryptax utilizes Stripe subscription billing to manage plan upgrades, renewals, and recurring payments, providing users with a seamless and secure payment experience. Each subscription tier offers varying levels of access to AI tools, detailed analytics, and expert chat services.

The AI Chat Assistant is available 24/7 to help users navigate complex crypto tax scenarios, while the Live Expert Chat feature ensures immediate, personalized advice from human consultants during working hours. Users receive automated notifications and email alerts regarding report status, billing, and account activity.

Security is a top priority, with bank-grade 256-bit SSL encryption, 24/7 system monitoring, and compliance with regulatory standards to protect user data and financial information.

Cryptax empowers users with accurate, efficient, and expert-backed crypto tax support, delivering peace of mind through automation, transparency, and professional service.
