farhadmiky@gmail.com
github/AlMamunFarhad
Bangladesh, Dhaka, Mirpur-1

I'm a full-stack web developer focused on building secure, scalable, and well-structured applications. I work primarily with Laravel, Vue.js, and Core PHP (OOP), writing clean, modular code across both frontend and backend. I enjoy turning complex ideas into user-friendly, real-world solutions. I'm a strong team player and take full ownership of my work. I genuinely enjoy exploring new technologies and taking on challenges that push me to grow.

WORK EXPERIENCES

Full-Stack Development Expertise

Solid experience building scalable Laravel and Vue.js applications. Proficient in Eloquent ORM, RESTful API architecture, middleware, authentication, authorization, and advanced Blade templating. Build reactive Vue interfaces with Axios and lifecycle-based state control. Skilled in custom validation logic, policy/gate access control, reusable Laravel abstractions, structured exception handling, and Postman-based API testing.

Web Developer

SoftMind Technologies — On-site | Oct 2022 - Aug 2023

Developed and optimized reusable modules using PHP and OOP, focusing on clean architecture, performance, and scalability. Improved UX through efficient UI logic and resolved complex functionality issues across core systems.

Freelance Front-End Developer

Fiverr — Remote | Nov 2023 - April 2024

Delivered 45+ responsive frontend projects using HTML, CSS, Bootstrap, and JavaScript, tailored to diverse client needs. Managed full project lifecycle from requirement analysis to final delivery, ensuring clear communication and timely, high-quality output.

Front-End Intern

Tech Solutions — On-site | July 2021 - Mar 2022

Assisted in client projects focusing on responsive UI using HTML, CSS, and Bootstrap, with attention to cross-platform consistency.

PROJECTS

Laravel Vue JS Inventory System (Laravel & Vue JS)

GitHub: github.com/AlMamunFarhad/Laravel-vuejs-inventory-system

Tech Stack: Laravel, Vue JS, MySQL, Bootstrap

Built a scalable inventory system with product, employee, and expense modules. Used Laravel backend with Vue.js frontend and Axios for real-time updates. Implemented role-based access and responsive dashboard.

Laravel Career Portal (Laravel & MySQL)

GitHub: github.com/AlMamunFarhad/Laravel-career-portal

Tech Stack: Laravel, MySQL, AJAX, jQuery, Bootstrap, Blade Templating

Developed a career platform with dynamic job posting, category filtering, and admin-user dashboards. Integrated secure authentication, mail notification, and Laravel Blade templating.

Photo Gallery Platform (Core PHP & OOP)

GitHub: github.com/AlMamunFarhad/oop-gallery-management-system

Tech Stack: PHP, Object-oriented programming (OOP), MySQL, Bootstrap

Designed a dynamic image gallery with multi-image upload, login system, and comment section using PHP OOP and MySQL. Focused on clean architecture and code reuse via autoloading.

SKILLS

Technical Skills

Backend: Laravel, PHP (OOP), RESTful APIs

Frontend: Vue.js, jQuery, AJAX, JavaScript, Bootstrap, Tailwind

Database: MySQL, PostgreSQL, SQLite

Tools: Git, GitHub, Postman, VS Code

Skills Highlights

Laravel

Authentication, Access Control, Middleware, RESTful API, API Resource, Validation, Eloquent ORM, Relationships, File Handling, Blade Components, Exception Handling, Modular Structure, Service-Based Architecture, Unit Testing.

Vue.js

Skilled in building component-based UIs using Vue.js, with Axios integration, reactivity, lifecycle hooks, state management, and Vue Router for SPA navigation.
